of various disposable containers**

Roma Company

Product Quality

The quality of Roma Company's products is our priority. We use the finest raw materials for producing our containers, and all production stages are closely monitored. Our product quality features include:

- **Health Standards:** All products are manufactured according to national and international health standards.
- **Durability:** Our containers are resistant to heat, moisture, and impact, ensuring the contents are well-protected.
- **Innovation:** We are constantly striving to offer better products by using modern technologies to meet the diverse needs of our customers.

Biodegradability: In the production of plant-based containers, we use materials that decompose quickly in nature, helping reduce plastic waste.

Roma Company

Roma Company, with the goal of providing high-quality and eco-friendly products, produces and distributes various types of single-use containers, including plant-based, foam, aluminum, and crystal containers. Relying on modern technologies and observing global standards, we strive to offer products that are not only highly functional but also environmentally responsible

Our products include a variety of containers suitable for restaurants, cafes, events, and home use. By choosing our plant-based disposable containers, you can contribute to environmental conservation while enjoying a convenient and hygienic experience.

Our team, with years of experience in the packaging and production industry, constantly strives to provide the best services to customers. We place a special emphasis on quality, innovation, and customer satisfaction and aim to meet your needs by using the best raw materials and modern technologies.

Goals and Vision

Roma Company was founded with the aim of raising awareness about the use of eco-friendly disposable products. We seek to offer high-quality, functional products that help customers consider the environment in their choices. Our vision is to become one of the leading manufacturers and distributors of single-use containers in Iran and the region, enabling customers to use our products with confidence in their quality and sustainability

Plant-Based Disposable Containers

Roma's plant-based disposable containers are made from natural and biodegradable materials. These containers are not only hygienic and durable but also an ideal choice for those who care about environmental preservation.

- Raw Materials: Made from corn starch and eco-friendly polymers
- Biodegradability: 100% biodegradable in nature
- Temperature Resistance: Heat-resistant up to 120°C
- Sizes: Available in various sizes (mini, medium, large) for different needs
- Usage: Suitable for hot and cold foods, desserts, and salads
- Features: Leak-proof, hygienic, and attractively designed

Foam Containers

Roma's foam containers are a suitable choice for serving hot and cold foods due to their lightweight and excellent insulation. These containers, which are moisture and heat-resistant, protect their contents well.

- **Raw Materials:** Made from polystyrene foam
- **Thermal Insulation:** Maintains temperature for hot and cold foods over time
- **Temperature Resistance:** Heat-resistant up to 90°C
- **Sizes:** Available in various sizes from small to large
- **Usage:** Suitable for serving fried foods, stews, soups, and beverages
- **Features:** Lightweight and portable, moisture-resistant, with practical and attractive designs

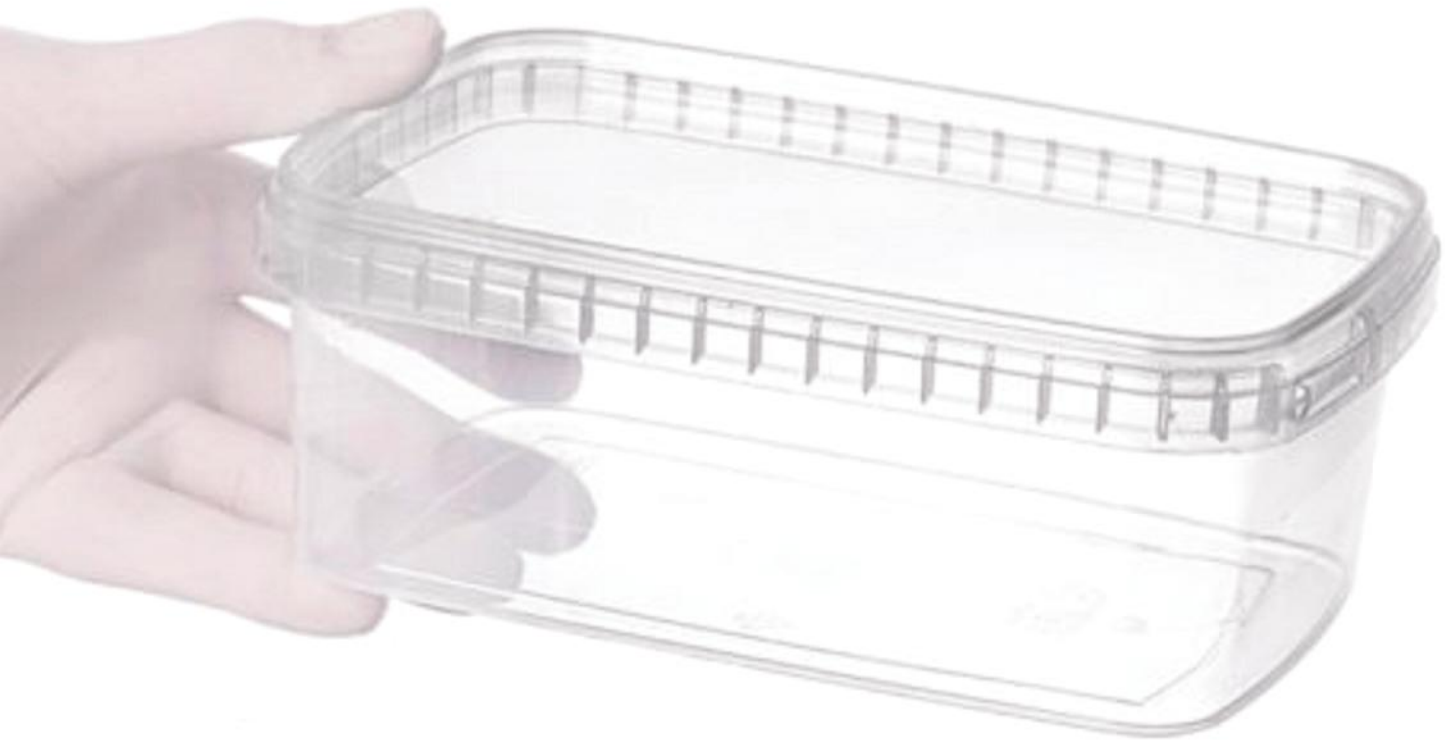

Aluminum Containers

Roma's aluminum containers, known for their lightness, durability, and recyclability, are an excellent choice for single-use applications.

- Raw Materials: Made from high-quality aluminum
- Temperature Resistance: Heat-resistant up to 300°C
- Sizes: Available in a variety of sizes from small to large containers
- Usage: Suitable for cooking in the oven and storing in the refrigerator
- Features: Lightweight and portable, recyclable, with various designs for different uses

Crystal Containers

Roma's crystal containers, with their elegant design and high transparency, add a special touch to any dining table. These containers are ideal for serving desserts, salads, and beverages and enhance any special occasion with their excellent quality.

- Raw Materials: Made from high-quality transparent plastic (polyester)
- Transparency: Beautiful and transparent design for stylish food presentation
- Temperature Resistance: Resistant to normal temperatures up to 70°C
- Sizes: Various containers for desserts, salads, and beverages
- Usage: Suitable for gatherings, parties, and home use
- Features: Washable and reusable, with diverse and attractive designs

Customers can use our products with confidence in their quality and

Packaging Types

Roma Company uses a variety of efficient packaging to both protect product quality and facilitate easy transportation. Our packaging includes:

1. **Single Packaging:** For products sold individually, such as plant-based and foam containers.
2. **Multipacks:** Suitable for larger quantities, such as packs of 10 or 50
3. **Special Packaging for Industries:** Designed for restaurants and cafes, including larger, customizable boxes.
4. **Eco-Friendly Packaging:** Made from biodegradable and recyclable materials, allowing consumers to feel confident in the sustainability of their choices.
